

# WSGWA Virtual Classes

Due to COVID 19, our classes will be available virtually. This means all classes will only be able to be viewed using a computer or smart phone. Each attendee must fill out the registration form on the following page, being sure to include (legibly) an active email address. Once WSGWA receives your registration form (before October 21st), a link will be emailed to you.

Sometime during the class, a code will be given out by the instructor. Write this code down as you will need to email all of your codes to colleenmastro@hotmail.com. Once I receive your codes and verify that you have already registered and paid, I will email you your CEU sheet, similar to the one you would normally get on in person class days. The process after that will be the same: make a copy and send it to Ecology.

Pump Installers will be tracked on Roger Chick's day as well, he will submit a roster to L&I.

## Round 1 Well Construction (7 Driller CEU) \*classes and times subject to change
